LE THI DUYEN

Senior backend engineer with 9 years of experience.

- Expert in **payment system** integrations.
- 6 years of **Django** development. Hexagonal, domain-driven coding practices.
- Thorough **database** know-how.
- **Cloud** infrastructure and management.
- Seasoned in **production** management and on-call response.

Professional Experience

PROSE | **SENIOR BACKEND ENGINEER** | **AUG 2022 – PRESENT**

Beauty-tech startup offering personalized haircare and skincare. Django / DRF backend on a 1.45 TiB PostgreSQL database (300 tables), serving 45 requests/second on average, with peaks of 80 RPS.

- **Payment architecture owner:** Led the Stripe migrations from Charges to PaymentIntents and from the Sources API to the PaymentMethods API. Designed the dual-mode billing layer so legacy and new payment instruments coexist during the rollout, and handled webhooks, retries, refunds, disputes, and edge cases.
- **Subscription and order flows:** Own the subscription renewal, review-and-refine, and order placement domains, including renewal billing through Celery tasks with idempotency and debouncing guarantees.
- **Zero-downtime delivery:** Designed expand-contract schema migrations and backward-compatible API changes so every deployment ships without downtime on database tables with a billion actively-used rows.
- **Architecture:** Refactored the subscription, order, and pricing domains toward Domain-Driven Design (domain services, application services, repositories) to isolate business rules from the Django layer.
- **Integrations:** Built frontend-facing APIs and webhook integrations with Brightback, Friendbuy, Iterable, Kustomer, and other services.
- **Observability and CI:** Set up backend CI jobs and Datadog monitors and dashboards to track endpoint performance and investigate production incidents.
- **AI-assisted engineering:** Built the team's Claude Code tooling: custom review agents for migration safety, ORM query performance, SOLID and design patterns, plus skills that scaffold endpoints and factories, review PRs, and automate Jira-to-PR workflows.

Tech stack: Python, Django, Django REST Framework, Celery, PostgreSQL, Redis, Elasticsearch, Stripe, PayPal, Kubernetes, GCP, Datadog, Sentry, GitLab CI, Github CI, Claude Code

TELEOPHTALMO | FULLSTACK DEVELOPER | MAR 2021 – AUG 2022

Med-tech startup improving access to ophthalmology in rural France.

- Refactored a Django MVT application using clean architecture principles and transformed the backend into a RESTful API with Django REST Framework.
- Developed a React UI, implemented Elasticsearch, optimized database queries and strengthened security with 2FA and AWS presigned URLs.

SELL | FULLSTACK DEVELOPER | NOV 2017 – FEB 2021

Marketing technology company developing SellBase, a product information and campaign platform.

- Developed modules and connectors synchronizing SellBase with Odoo, Gemalto and GFK (PHP, CodeIgniter, MySQL).
- Built a B2B e-commerce website on top of the SellBase catalog.

DATAWINGS | FRONT-END DEVELOPER | APR 2017 – SEP 2017

- Developed frontend features with JavaScript, jQuery and Bootstrap; supported specifications and client communication.

Technical Skills

- **Backend:** Python, Django, Django REST Framework, Celery, pytest, PHP, CodeIgniter,
- **Data:** PostgreSQL, MySQL, Redis, Elasticsearch, DynamoDB
- **Cloud and delivery:** GCP, AWS, Kubernetes, Docker, Docker Compose, GitLab CI, CircleCI, Linux
- **Observability:** Datadog, Sentry, Flipt feature flags
- **Tooling:** Claude Code (custom agents and skills), Git
- **Frontend:** React, JavaScript, HTML, CSS, SCSS

Education

- **Aix-Marseille University** — Master in Information Technology, October 2016 – September 2017
- **Aix-Marseille University** — Master in International Business Management, September 2014 – September 2015
- **Eiffel Excellence Scholarship**, French Ministry of Foreign Affairs
- **University of Commerce, Hanoi, Vietnam** — Bachelor of Business Management, 2009 – 2013
